DETAILED ACTION

**THE FOLLOWING IS A NEW GROUND OF REJECTION NECESSITATED BY THE
AMENDMENT**

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 9 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

- A) Claim 9 is indefinite because it is a method claim that depends on product claim 5 and recites no active method steps.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b)

Art Unit: 1656

only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claims 4-6 & 9-12 are rejected under 35 U.S.C. 102(e) as being anticipated by Shi et al (US5,919,626 July 6, 1999).

Shi et al teach a immobilizing nucleic acids onto solid supports such as polystyrene plates or glass (see whole doc. esp. abstract & col.4 line 36 & line 65). They teach that immobilized solid support may be used in hybridization assays for detecting mutations (see abstract & col. 10 lines 46-52-51 & col. 11 line 34). They also teach oligonucleotides of of various lengths such as 37mer (see col. 16 line 65 & SEQ ID NO:1).

Applicant is reminded that oligonucleotides would meet the limitation as a nucleic acid having a polymer containing an unsaturated bond.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 7 & 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Kawai (Anal. Biochem vol. 209 pp. 63-69 1993).

Kawai et al teach the oligonucleotides immobilized onto polystyrene plates and fixed by UV irradiation at 254 nm (see whole doc. & page 64) They teach binding 56 bp probes (see page 67).

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
